EDUCATION

Vellore Institute of Technology **Vellore, Tamil Nadu**
Integrated M. Tech in Software Engineering, CGPA: 8.69 *August 2023 – Present*

SUMMARY

I am a third-year Software Engineering student passionate about problem-solving and continuous learning. Currently, I am honing my programming skills through practical exposure. My interests also extend into design, where I enjoy creating logos and promotional materials. I thrive in team environments and take responsibility for my contributions while improving both my technical and creative skills

PROJECTS

Smart India Hackathon ***September 2025***
A project focusing on enhancing the efficiency and scheduling of the Kochi Metro (Team- Metrix)

- Developed an AI-based decision-support system for Kochi Metro train deployment and scheduling.
- Implemented predictive maintenance using ML to reduce breakdowns.
- Designed secure, role-based admin and management dashboards.
- Addressed challenges in automation, operational efficiency, and cost optimization.

Networks Information Security ***October 2025***
A secure website for analyzing password strengths (Team) - ***Website***

- Built a full-stack Password Security Checker using Flask, HTML, CSS, and JavaScript.
- Implemented real-time password strength analysis based on complexity and entropy.
- Integrated breach-detection APIs to check whether entered passwords were exposed in known data leaks.
- Developed a secure password generator with instant strength feedback.
- Designed a clean, cyber-themed responsive user interface for better user experience.

Machine Learning & Data Mining ***October 2025***
A project to forecast solar energy production using machine learning techniques (Team) - ***link***

- Used AI to build a solar energy forecasting system using real-time and 3+ lakh historical data records.
- Applied machine learning models for accurate power prediction.
- Performed data preprocessing, feature engineering, and normalization to improve model performance.
- Visualized actual vs. predicted power outputs for model validation and analysis.

TECHNICAL SKILLS

- **Language Proficiency:** Tamil, Telugu, English
- **Programming & Frameworks:** Python, SQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Design & Tools:** Canva, Photoshop, Illustrator, MS word, VS Code,
- **Core Concepts:** DBMS, Operating Systems, Computer Networks, Artificial Intelligence

STRENGTHS

- **Soft Skills**: Leadership, Organizing, Communication, Networking, Teamwork & Collaboration, Learning Agility, Strategic Thinking, Good Samaritan.

ACHIEVEMENTS & CERTIFICATIONS

- Designed the **Official Logo** for the IPR & TT Cell (VIT Vellore) - ***link***
- Created event posters and visual creatives for various clubs at VIT
